

PACKMAKER

Multifunctional laser machine for flexible packaging.

- **PackMaker** is the new system introduced in the PackMaster family and represents an opportunity for flexible packaging customers to have a versatile system able to perform both in cross web and web direction jobs.
- Maximum roll width: up to 1800 mm.
- It can be easily integrated into existing production lines.
- Modular solution: up to 8 upgradeable lasers.
- Quality: very high precision in the material removal and micro/macro-perforation, repeatability of the process over time and register die-cutting.
- Flexibility: the full digital process enables immediate process changeover and a substantial reduction in time and costs of production (which is not possible in the case of "analogue" mechanical solutions).
- ICARO proprietary software.
- Industry 4.0 Ready: full digital workflow integration.
